

CRUISE CONTROL

Cruise Control Wiring Diagram for Buick LeSabre Custom 2004

List of elements for Cruise Control Wiring Diagram for Buick LeSabre Custom 2004:

- (in i/p harness, 23.5 cm from instrument cluster breakout) s201
- Cr cont fuse 10a
- Cruise control module (on left side of engine comp, on strut tower)
- Cruise control on sw

- Cruise ind
- Cruise inhibit
- Cruise on/off
- Cruise set/coast
- Disable output
- Engage ouput
- Engaged input
- G106 (near left strut tower)
- Ground
- Head up display (hud) (on top left side of dash)
- Hot at all times
- Hot in on or start
- Ign 1 fuse 10a
- Ignition
- Inflatable restraint steering wheels module coil (steering wheel)
- Instrument panel cluster (ipc)
- Left steering wheels controls
- Logic
- Nca
- On/off
- Pnk
- Powertrain control module (pcm) (in air cleaner housing)
- Rear fuse block (under left rear seat)
- Resume/ accel
- Resume/accel
- Right steering wheels controls
- S215 (in body harness, 19.5 cm from p100)
- S216
- S228
- Set/ coast
- Sp106
- Sp301 (in body harness, 8.5 cm from g300 breakout)
- Speed input
- Steering column fuse holder
- Stop lamp switch (on brake pedal bracket)
- Stop lp fuse 15a
- Stp lp sig input
- Transmissions system
- Underhood fuse block (right front side of engine compt)
- Vehicle speed input
- Vehicle speed out
- Vehicle speed sensor (vss) (on top right side of transmission output housing)
- Vehicle speed signal
- Vss high
- Vss low
- W/ head up display
